Prescript

This Cumulative Index for the first thirteen annual volumes of The American Journal of Pharmaceutical Education is one of the fortunate by-products of The Pharmaceutical Survey.

When the plans for the organization and conduct of The Survey were being prepared in the summer of 1946, it was immediately evident that the files of The Journal represented a principal source for needed background data and information relative to the recent past of American pharmaceutical education, and of the activities of the American Association of Colleges of Pharmacy. However, it soon became clear that the effective use of The Journal was severely handicapped by the lack of proper indices.

At the Pittsburgh meeting of the American Association of Colleges of Pharmacy, I made reference to this difficulty, and suggested the numerous advantages of a proper index to all the volumes of The Journal. Dr. Rufus A. Lyman, the in-seeing editor of The Journal, recognized the importance of such an index. From then the Index became a project for The Journal and the Association. If and when prepared, The Survey was willing to assume the responsibility for the publication of the Index.

The Index in its present form would not have been possible without the generous and competent industry of Dr. James M. Dille of School of Medicine and Dr. Heber W. Youngken, Jr., of the College of Pharmacy of the University of Washington. All students of American pharmaceutical education, now and hereafter, are placed under lasting obligation to them for their timely service. Those responsible for The Survey have satisfaction in being able to count this publication as a real contribution for the study of the present and the future of pharmaceutical education.
